Show audits relevant to: All FCP LCP TBT

DIAGNOSTICS

- ▲ Eliminate render-blocking resources — Potential savings of 240 ms
- ▲ Reduce unused JavaScript — Potential savings of 54 KiB
- ! Preload Largest Contentful Paint image — Error!
- ! Largest Contentful Paint image was not lazily loaded — Error!
- ! Avoid large layout shifts — Error!
- ! Avoid non-composited animations — Error!
- ! Largest Contentful Paint element — Error!
- ○ JavaScript execution time — 0.1 s
- ○ Initial server response time was short — Root document took 70 ms
- ○ Avoids enormous network payloads — Total size was 113 KiB
- ○ Avoids an excessive DOM size — 35 elements
- ○ Avoid chaining critical requests — 2 chains found
- ○ Minimizes main-thread work — 0.4 s
- ○ Avoid long main-thread tasks — 2 long tasks found

PASSED AUDITS (25)

Show

Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so manual testing is also encouraged.

ADDITIONAL ITEMS TO MANUALLY CHECK (10) — Hide

- Interactive controls are keyboard focusable
- Interactive elements indicate their purpose and state
- The page has a logical tab order
- Visual order on the page follows DOM order
- User focus is not accidentally trapped in a region
- The user's focus is directed to new content added to the page
- HTML5 landmark elements are used to improve navigation
- Offscreen content is hidden from assistive technology
- Custom controls have associated labels
- Custom controls have ARIA roles

These items address areas which an automated testing tool cannot cover. Learn more in our guide on conducting an accessibility review.

Best Practices

TRUST AND SAFETY

- Ensure CSP is effective against XSS attacks

PASSED AUDITS (14) Show

NOT APPLICABLE (2) Show

As per Chrome's updated Installability Criteria, Lighthouse will be deprecating the PWA category in a future release. Please refer to the updated PWA documentation for future PWA testing.

PWA

These checks validate the aspects of a Progressive Web App. Learn what makes a good Progressive Web App.

INSTALLABLE

- Web app manifest and service worker meet the installability requirements

PWA OPTIMIZED

- Configured for a custom splash screen
- Sets a theme color for the address bar.
- Content is sized correctly for the viewport
- Has a `<meta name="viewport">` tag with `width` or `initial-scale`
- Manifest has a maskable icon

ADDITIONAL ITEMS TO MANUALLY CHECK (3) Hide

- Site works cross-browser
- Page transitions don't feel like they block on the network
- Each page has a URL

These checks are required by the baseline PWA Checklist but are not automatically checked by Lighthouse. They do not affect your score but it's important that you verify them manually.
